# Fitness Tracker

**Add Workout** ← button click shows a popup with option to add exercises to the workout.

**Display Workouts** ← Shows a popup with all the previous workouts done so far

**Save Data** ← Saves all the existing data into a csv file

**Load Data** ← load all the data from a csv file into our current data objects

**Search Workout** ← shows a popup to let us enter a date using which it will display a workout

## STATS

This section will show the general stats of the user. For example - days worked out, total time spent etc.
